

Packaging and Shipping

Standard Packaging

Job Pack (P1) – 4x4 or 4x8 Pallet

Standard for the following fixtures when ordering 10 or more units unless otherwise specified:

- 50 Series¹
- AL Series
- BL Series
- DI Series
- EFT Series
- EP Series
- GL Series
- HE3 Series
- HET Series
- LPT Series
- U4 Series

Packaging Specifications:

- 4' x 4' or 4' x 8' pallet (determined by fixture size).
- Branded corrugated endcaps and corner boards.²
- Top and bottom 4' x 4' corrugated panels minimize dust and debris on fixtures.
- Entire pallet is stretch wrapped with heavy-gauge film.
- Packaging components are 100% recycled.
- Carton Pack available when specified.
- Horizontally stacked for stability.

Carton Pack – 4x4 or 4x8 Pallet

- Standard for all Williams fixtures except those listed as Job Pack (P1).
- When ordering less than 10 units, Carton Pack is required.

Packaging Specifications:

- Products packaged in cartons.
- 4' x 4' or 4' x 8' pallet (determined by fixture size).
- Branded corrugated corner boards.²
- Entire pallet is stretch wrapped with heavy-gauge film.
- Packaging components are 100% recycled.
- Optional Job Pack available on qualified fixtures.
- Visible orange label indicates multiple fixture types per pallet.
- Visible red label indicates EM fixtures on pallet.
- Horizontally stacked for stability.

Williams' commitment to quality doesn't end when a fixture comes off the line. Proper packaging and shipping is a critical part of our quality process. That's why every fixture we ship is wrapped with the Williams name proudly displayed on every carton and corner board.

PACKAGING FEATURES

At Williams, we take extra steps to ensure your shipments arrive in pristine condition. Extra care is taken to label each pallet with information that will assist the end user. Pallets containing EM ballasts, a variety of fixtures, or fixtures that require special care are all clearly identified with brightly colored labels. Attention to details like these is one more way that H.E. Williams makes A Visible Difference.

SHIPPING

Airbags provide a cushion between product pallets on qualified shipments.

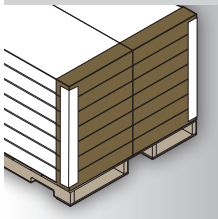

- Prevents load shift during transport.
- Reduces damaged shipments.

Shipments should arrive with our branded corner boards in place.² If it doesn't say "Williams," carefully inspect each shipment and indicate damage on delivery ticket.

Packaging Options

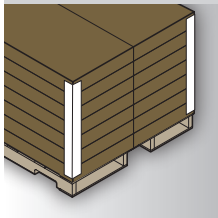

Optional Job Pack (P2) – Two 2x4 Pallets

Packaging Specifications:

- Two 2' x 4' pallets stretch wrapped together with heavy-gauge film—split to go through standard door.
- Available as an option for all fixtures that are standard P1 packaging when ordering 10 or more units.
- Branded corrugated endcaps and corner boards.²
- Top and bottom corrugated panels minimize dust and debris on fixtures.
- Packaging components are 100% recycled.
- Horizontally stacked for stability.

Optional Carton Pack – Two 2x4 Pallets

Packaging Specifications:

- Two 2' x 4' pallets stretch wrapped together with heavy-gauge film—split to go through standard door.
- Available as an option for all fixtures.
- Products packaged in cartons.
- Branded corrugated corner boards.²
- Packaging components are 100% recycled.
- Horizontally stacked for stability.

¹ Job Pack is not used for flange, triple-gasket, and back-mount units; standard Carton Pack applies.

² Corner boards provided on full pallets.
